

Description

A floor standing mortiser with a 25mm capacity. The unique screw and fast action nut allows the material clamp to be set across its length in seconds. With fully adjustable slideways the mortiser has travel in both directions with lock on the fore and aft setting. The main operating handle has a clever ratchet setting which allows it to be quickly set in the correct position for optimum leverage. The depth stop is simple and very effective to use. Along the back of the main table is a mortice length setting device which allows the mortice length to be pre-set for reduced marking out. The cabinet stand incorporates a shelf in the base for storage of chisels, bits and service tools.

Specification

Model:	HCM 26
Capacity:	145 x 210mm
Centre of Chisel to Back Fence:	140mm
Max Chisel Size Hardwood:	19mm
Max Chisel Size Softwood:	25mm
Nett Weight:	124kg
Overall L x W x H:	560 x 460 x 820mm (1,450mm w/stand)
Motor:	750W
Rating:	Industrial
Chisel Stroke:	145mm
Max Height of Timber with 12.7mm Chisel and Bit:	210mm
